**Process Description**

The operating cycle before bottling consists of the following steps:

1. Preparation of the aromatic essence by distilling botanicals, spirit and demineralised water together in a pot still
2. Blending of the resulting essence with grain spirit and demineralised water to the required strength
3. Cartridge filtration, analytical check and final approval.

**Product Shelf Life**

The product has no defined expiring date.  
 It is recommended to carefully rotate warehouse stocks to maximize product freshness.

**Preservation Recommendations**

As all food products, it is sensitive to excessive and extended light and heat exposures, that can damage its typical fragrance. During transportation and warehousing it is necessary to avoid to expose the product to:

- high temperatures (over 30°C for 20 days)
- direct indoor light for long time
- direct sunlight (never)
