PRODUCT SPECIFICATION

Product name:
Sliced tomato with tomato juice

Ingredients			Tomato, tomato juice. Acidity regulator: citric acid		
Name			Sliced Tomato		
Metal jars	3/1	Net weight (g)	400	Drained weight (g) 240	>60% Declared net weight
Package Description		Metal jars	Conservation method		Keep away from heat sources, keep in the fridge after opening and consume it within 3 days
Shelf- life product			3 years		
Product Description			Sliced tomato in metal jars, with the addition of tomato juice, stabilized by a sterilization process		
Microbiological parameters			Yeasts and molds: ≤ 40%		
Nutritional values related to 100 g of drained product			Energy value: 19 Kcal/ 79 KJ Protein: 1,2 g Carbohidrates: 2,8 g		

	Fats: 0,1 g – of which saturated 0 g Fibers: 0,9 g Salt: 0,1 g
Organoleptic Characteristics	Optical aspect: characteristic Constistency: good Smell: Typical, without stranger notes Color :≥ 2.20 a/b GARDNER
Any additional notes	Safety and quality in the production process are guaranteed with the adoption of the HACCP system and with periodic analytical checks on the representative samples of the production

PRODUCT SPECIFICATION

Product name: Yellow cherry tomatoes
(tomatoes cut into small pieces)

Ingredients			Yellow cherry tomatoes, water, salt		
Name			Yellow cherry tomatoes		
Tin	3/1	Net weight (g)	950	Drained weight (g)	>60% Declared net weight
Package Description		Glass vase	Conservation method		Keep away from heat sources, keep in the fridge after opening and consume it within 3 days
Shelf- life product			3 years		
Product Description			Yellow cherry tomatoes cut in small pieces		
Microbiological parameters			Yeasts and molds: ≤ 40%		
Nutritional values related to 100 g of drained product			Energy value: 33 Kcal/ 141 KJ Protein: 1,9 g Carbohidrates: 4,6 g – of which sugar 4,6 Fats: 0,4 g – of which saturated 0 g Fibers: 1,9 g		

	Salt: 0,06 g
Organoleptic Characteristics	Optical aspect: typical color Variety: Roma Smell: Pleasant Juice Apperance: Normal
Any additional notes	Safety and quality in the production process are guaranteed with the adoption of the HACCP system and with periodic analytical checks on the representative samples of the production
